

# Jmol

an open-source Java viewer for  
chemical structures in 3D  
with features for chemicals,  
crystals, materials and biomolecules

**Angel Herráez**

Dep. Biochemistry & Molecular Biology,  
Alcalá de Henares (Spain)

## Introducing the speaker

**Angel Herráez**

Dep. Biochemistry & Molecular Biology,  
University of Alcalá

Alcalá de Henares (Spain)

## Technical

- Triple formula:
  - **Jmol application** (3.7 MiB)
  - **JmolApplet** ( $\leq 1.1$  MiB, modular)
  - **Systems integration component** (library, to insert Jmol into other software)
- JVM 1.4 (1.1 applet?)
- There is a signed version of the applet, but most use unsigned

[www.jmol.org](http://www.jmol.org)

## Background..

- Motivation for the project
  - XMol (molecular viewing program, Minnesota Supercomputer Center)
    - source code not available to users
    - no longer being maintained
    - free binary versions had become obsolete
  - Chime (MDL Inc.)
    - derived from RasMol (open code, Roger Sayle)
    - proprietary code
    - not updated to support new web browsers

[www.jmol.org](http://www.jmol.org)

## ..Background..

- Development milestones

- Jmol v. 1 - 9:

- Dan Gezelter: Jmol invention, open source (an OpenScience project), as XMol replacement
- Bradley Smith
- Egon Willighagen; integration with The Chemistry Development Kit

J. Daniel Gezelter  
U. Notre Dame, USA

Egon L. Willighagen  
Radboud University  
Nijmegen, The Netherlands

www.[Jmol.org](http://Jmol.org)

## ..Background..

- Development milestones

- Jmol v. 10:

- Michael Howard (*Miguel*)
- RasMol/Chime compatibility
- reworked graphics engine
  - no Java2D graphics
  - software-based graphics
  - no specialized graphics hardware
  - up to 10<sup>5</sup> atoms (Java memory is the limit)
- separate modules (e.g. file I/O)
- feedback from users; expansion
- v. 10.0 released on Dec.2004 (10.2 Apr.06)

Michael T. Howard  
USA

www.[Jmol.org](http://Jmol.org)

## ..Background

### ● Development milestones

- Jmol v. 11:
  - Bob Hanson
  - expanded functionality
  - broader coverage for multiple disciplines
    - organic
    - inorganic
    - materials
    - object drawing
    - mesh & iso-surfaces
    - bio(macro)molecules
    - crystallography
    - nanostructures
    - mathematical functions
    - sudoku ...
  - 11.0 (Feb.07), 11.2 (Aug.07), 11.4 (Jan.08)

Robert M. Hanson  
St. Olaf College, USA

www.[Jmol.org](http://www.jmol.org)

## Future..

- Currently, mainly driven by users' requests (and Bob's imagination)
- "Jmol math"
  - variables (atom-associated or otherwise)
    - boolean, integer, decimal, string, point, plane, atom bitset, bond bitset, array
  - operators: and or not + - \* / modulus
  - custom atom properties, external data
  - conditionals and loops
    - for / end for, if / else if / else / end if, while / end while, goto
  - extract or assign information per atom

www.[Jmol.org](http://www.jmol.org)

## ..Future

- Some interests
  - better secondary structure assignment for proteins
  - calculate H bonds between sidechains
  - export animated images
  - a preloader applet (to advise that Jmol is on its way)
  - better documentation, maybe built-in
  - multi-user environments
  - integration in Wikipedia

[www.jmol.org](http://www.jmol.org)

## Uses of Jmol

## Uses: instruction

- Tutorials for teaching
- Open investigation of molecular structures
  - Jmol app
  - FirstGlance in Jmol (Eric Martz)
- Wikis
- Moodle, WebAssign, LON-CAPA sites
- Animated reaction mechanisms

[www.jmol.org](http://www.jmol.org)

## Uses: database viewer

- Viewer in databases
  - RCSB Protein Data Bank (PDB)
    - OCA Browser
    - STING Millennium
    - FirstGlance in Jmol
  - ChemExper Chemical Directory
  - Inorganic Crystal Structure Database
  - The Virtual Museum of Minerals and Molecules
  - ...
- Viewer for Folding@Home projects (Nicolas Vervelle)

[www.jmol.org](http://www.jmol.org)

## Uses: enrich journals

- Journals: supplementary material for articles in papers
  - ACS Chemical Biology
  - Biochemical Journal
  - Chemical Reviews (ACS)
  - Crystallography Journals Online (IUCr)
  - Molecular BioSystems (Royal Soc. Chem.)
  - Nature Chemical Biology
  - Nature Structural & Molecular Biology
  - Inorganic Chemistry (ACS)
  - JACS
  - Journal of Chemical Education
  - Journal of Molecular Biology (soon)
  - Journal of Natural Products
  - Organic Letters

www.[Jmol.org](http://Jmol.org)

## Uses: Jmol within applications

- Bioclipse
  - integrated environment for biomolecule investigation
- CaGe
- ChemPad
  - 3D models calculated on-the-fly from a formula sketched by hand in a tablet PC
- iBabel
  - a GUI for Openbabel
- Janocchio
  - calculates NMR coupling constants and NOEs
- Molecular Workbench
- PFAAT (Protein Family Alignment Annotation Tool)
- ProteinGlimpse
- Spice
- STING Millennium
- STRAP
- Taverna

www.[Jmol.org](http://Jmol.org)

# Features

## Find out about features

- Web page, Wiki, scripting doc page
- Jmol web screenshots section
- Bob's test/demo pages
  - <http://chemapps.stolaf.edu/jmol/> [[link](#)]
- and Presentations
  - ConfChem (spring'06) - Bob, Egon, Nicolas, Tim & Miguel [[link](#)]
  - Nature Preceedings ('07) - Egon & Miguel [[link](#)] DOI:10.1038/npre.2007.50.1

## Web site

### Jmol: an open-source Java viewer for chemical structures in 3D

with features for chemicals, crystals, materials and biomolecules

**Demo presentation (pop-in)**

Jmol is an interactive web browser applet.

This is a still image, but you can get an animated display of Jmol abilities by clicking [here](#).

(The applet may take some seconds to load. Please, wait and do not reload the page in the meantime.)

www.Jmol.org

## Wiki (users contribution)

article discussion view source history

### Main Page

Jmol is a Java molecular viewer for three-dimensional chemical structures. Features include reading a variety of file types and output from quantum chemistry programs, and animation of multi-frame files and computed normal modes from quantum programs.

This is a start for the Jmol Community Wiki. On that page the Jmol user community can discuss everything that has to do with Jmol. Browse around in the page, and feel free to add new pages, extra information, comments, questions, links to useful Jmol Macro's, or whatever else you think is relevant.

Please post any and all comments in the Discussion Page (see on the top of the page) about how we can best organize this forum. Your contributions to the Jmol community are greatly appreciated! (Timothy Driscoll)

#### Pages on this Wiki

www.Jmol.org

## e-mail distribution lists

- Jmol-users
- Jmol-developers
- Jmol-commits
  
- access from Jmol web or project site
  - <http://jmol.org>
  - <http://sourceforge.net/projects/jmol>

[www.jmol.org](http://www.jmol.org)

## File input: Jmol can read...

- CIF, mmCIF, CML, CSF, GAMESS, Gaussian, Ghemical, gOpenMol PLT, HIN, Jaguar, MOL, Molden, MOLPRO, MOPAC, NWCHEM, Odyssey, OpenDX, PDB nmrPDB, Q-Chem, SHELX, SMILES, Spartan, XYZ, XYZvib ...
- Read one or several models, from one or several files
- Scripts (RasMol/Chime/Jmol), isosurfaces (Cube, jvxl), molecular orbitals
- Gzipped or zipped files
- From the clipboard
- Inline models (e.g. from web page or database)

[www.jmol.org](http://www.jmol.org)

## File output: Jmol can export...

- Molecular coordinates (mol, pdb, xyz), for part of the model
- Current model state as a script
- Isosurfaces (jvxl), inc. molecular orbitals
- Command history
- Images \* (png, ppm, variable jpg), PDF
- POV-Ray \*
- To the clipboard
- Web pages (several templates)
- VRML, Maya (preliminary)
  - \* screenshot of current view at custom size
- Custom export by adding a user's Java module

*app vs. applet*

www.[Jmol.org](http://www.jmol.org)

## What can Jmol calculate

- Autobonding based on element and distance
  - may be disabled
- H bonds (only protein backbone and nucleic base pairs)
- Alternating single/double aromatic bonds
- Distances, angles, dihedrals
- Distance to isosurfaces
- Secondary structure in proteins
- Disulphide bonds

www.[Jmol.org](http://www.jmol.org)

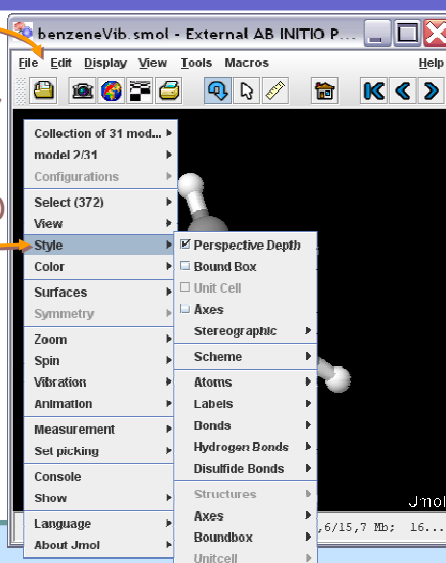

# Interface

- Mouse (rotation, zoom, translation)
- GUI menus
- Command line (commands, script files)
- Web page (applet + JavaScript)

## Menus and commands

Top menu  
[app only]  
(file operations,  
table of  
measurements,  
macros,  
basic rendering)

Pop-up menu  
[app & applet]  
(more powerful)

Command-line  
console  
[app & applet]  
(scripting language,  
full feature set)

## Controls in web page (JavaScript)

Once the molecular model has loaded into the black square:

Use player controls (below the model).

Move the model by dragging the mouse.

**Theoretical simulation by energy minimization**

**Spherical atoms.** The atomic radii used in this display (1.0 Å for oxygen, 0.7 Å for hydrogen) are intermediate between van der Waals and covalent radii.

**Sticks with dot surfaces.** The dot surfaces represent van der Waals radii.

**Sticks only.**

show H bonds (not visible for spheres), when distance from H to O is under 1.8 angstroms.

**Description:**  
Ten water molecules are initially arranged arbitrarily in two rows of five, not quite contacting each other. Their mutual chemical attractions then pull them into a compact micro-droplet. Each H<sub>2</sub>O molecule reorients itself to optimize the intermolecular interactions.

Jmol script terminated

www.Jmol.org

## Custom interface

- Internationalised & localised:
  - English, Spanish, French, German, Dutch, Portuguese, Brazilian, Czech, Turkish, Catalan, Estonian
  - defaults to system language
  - other language can be forced on-the-fly
  - even error messages
- Pop-up menu may be disabled
- Customisable pop-up menus

www.Jmol.org

# Crystallography

## Crystals

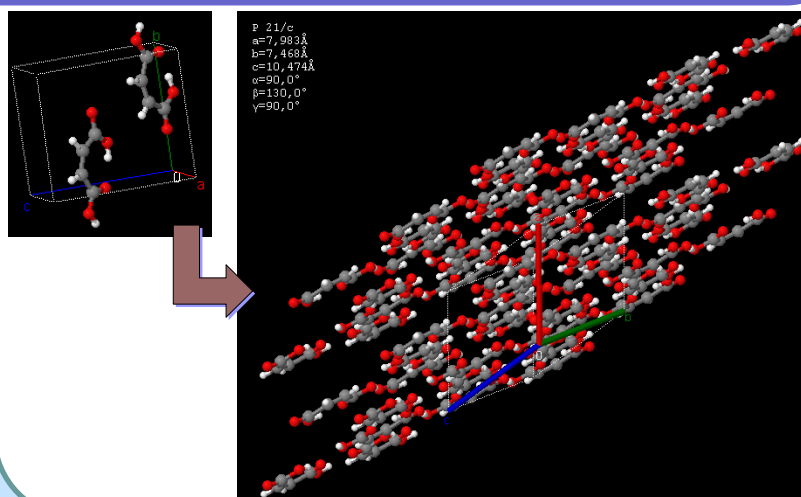

- Reads unit cell, symmetry and lattice information
- Handles fractional coordinates
- Manages crystallographic symmetry
  - loads a range of unit cells
  - determines the symmetry operations for a file
  - generates and fills extra unit cells
  - selects atoms based on distance from a plane
- Space groups and unit cells may be defined from any file format
- Planar slices through a model based on Miller index planes
- Extended options for unit cell and bounding box

## XTALX - Jmol Crystal Explorer

- Bob Hanson
- <http://fusion.stolaf.edu/chemistry/jmol/xtalx/>
  - search a database (either RCSB or the American Mineralogist Crystal Structure Database),
  - or enter the URL for any uncompressed model,
  - or select a model from the list,
  - or paste or edit file data here.
  - click on 'a' or 'b' or 'c' to see more unit cells

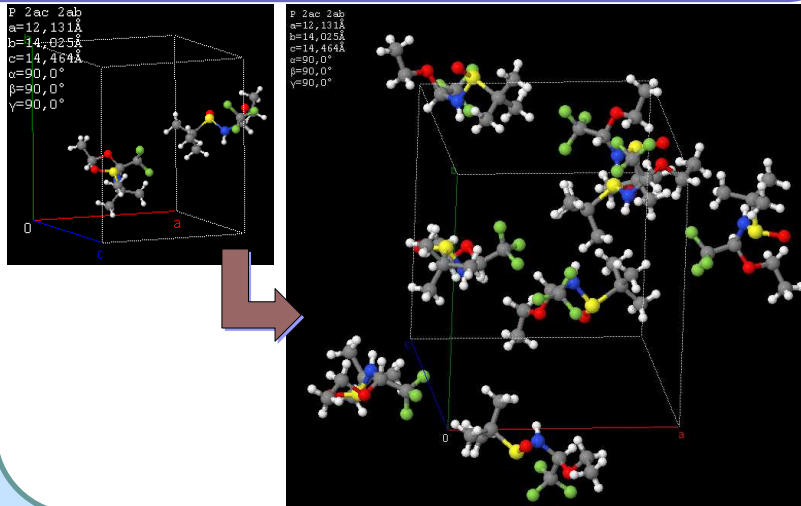

[www.jmol.org](http://www.jmol.org)

load "maleic.cif" 3 {2,2,2}; set showUnitCell on

[www.jmol.org](http://www.jmol.org)

```
load "kuds0105a.ccdc.cif" {1 1 1}; set showUnitCell
```

[www.Jmol.org](http://www.Jmol.org)

Polyhedra

NaCl

ZNQUKROD

[www.Jmol.org](http://www.Jmol.org)

# Surfaces

## Surface types

- **pMesh**
  - geometric data from file
- **isoSurface**
  - molecular data from file (Gaussian Cube, molecular orbitals, "Jmol voxel" jvxl)
  - calculated by Jmol
  - may be used for colouring (e.g., by electrostatic potential)
  - may be calculated using user's radii
  - style: dots / mesh / solid

## Molecular/solvent surfaces

biotin bound to its pocket between 2 streptavidin subunits

## Electrostatic potentials

Mapped onto an isosurface

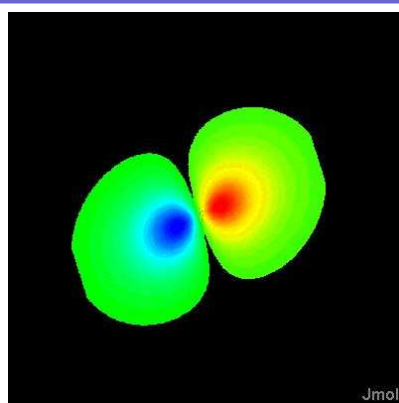

Bob Hanson

- User-settable charges for MEP calculation

[www.jmol.org](http://www.jmol.org)

## Atomic orbitals

Bob Hanson

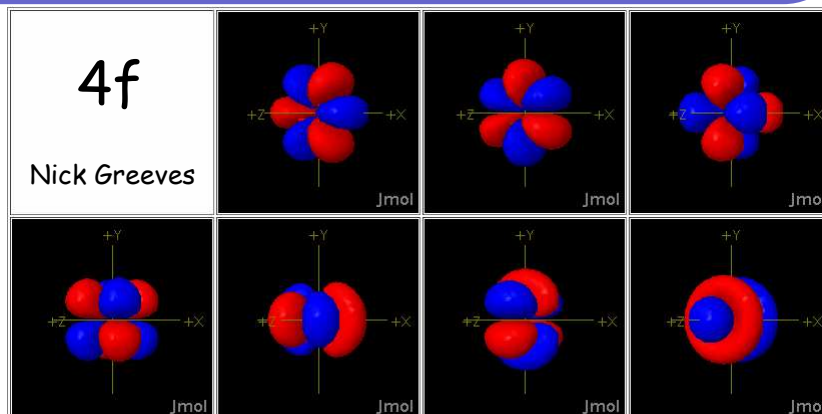

[www.jmol.org](http://www.jmol.org)

## Atomic orbitals

4f

Nick Greeves

- Support for spherical and cartesian d and f orbital basis sets

[www.jmol.org](http://www.jmol.org)

## LCAO “cartoons”

Bob Hanson

[www.jmol.org](http://www.jmol.org)

## Molecular orbitals

[www.jmol.org](http://www.jmol.org)

## Molecular orbitals

[www.jmol.org](http://www.jmol.org)

## Molecular orbitals

molecular  
orbital +  
molecular  
surface

Nick Greeves

[www.jmol.org](http://www.jmol.org)

## Lines, arrows, planes, mesh surfaces

[www.jmol.org](http://www.jmol.org)

## Ellipsoids, user-defined functions

Bob Hanson

[www.jmol.org](http://www.jmol.org)

## Isosurface implementation

- Adapted Marching Cubes algorithm
- Marching Squares algorithm
- Dynamic cube generation
- Read/write JVXL file format

Bob Hanson  
Miguel Howard  
Olaf Hall-Holt  
Won Kyu Park  
Daniel Severance  
Bill Jorgensen

[www.jmol.org](http://www.jmol.org)

## Models in movement

### Moving models: animations

- Save (to memory) and restore model orientation and state
- Scripted movement of the model
  - translation + rotation + zoom
- Multiple models in one or several files
  - conformational change
  - reaction intermediates
    - (Nick Greeves, [www.ChemTube3D.com](http://www.ChemTube3D.com))
- Vibration
  - associated to frequencies
  - animated vibration and vectors

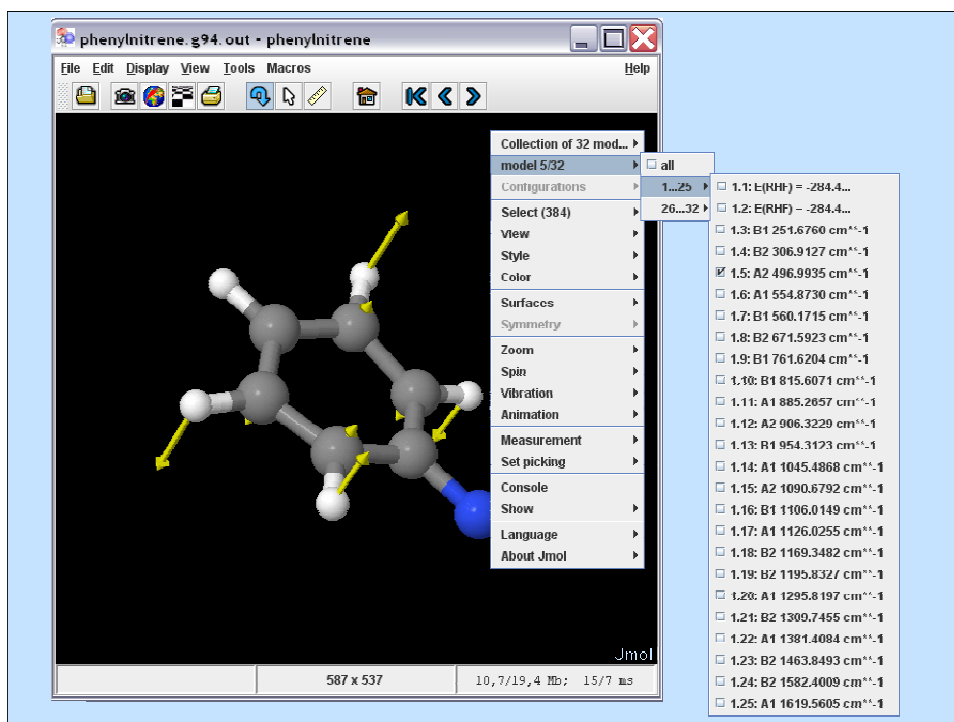

## Vibration

- Shows vibration direction and amplitude as 3D arrows
- Shows vibration as animation
- List of frequencies (for multimodel files with a vibration in each frame)

- Demo

www.Jmol.org

## Miscellanea

### Improved image quality

- Smoothing of ribbons
- Partial translucency (8 levels, several layers)
- Antialiasing for display and for export
- Export to POV-Ray
  - <http://chemapps.stolaf.edu/jmol/docs/examples-11/povray.htm>
- Export to Maya and VRML

## Jmol to POV-Ray

[www.jmol.org](http://www.jmol.org)

## Limited model edition

- Bonds can be created, modified or deleted
  - single, multiple, aromatic and several types of partial bonds
- Atoms can be moved
- Translation, rotation, spinning, and point/plane inversion of selected atoms
- Atoms can be added
- Atom properties can be set directly using Jmol math or with an array

[www.jmol.org](http://www.jmol.org)

## Annotation

- Atom labels, group labels, frame labels
  - label frame and pointer
- Crystallographic information
- Free text ("echo")
  - positioned in 2D or 3D
  - multi-line
  - font control: face, size, style, colour
  - Unicode character support
  - may act as hyperlink

[www.jmol.org](http://www.jmol.org)

## More

- Slab and depth planes (cut through the model)
  - world coordinates or model coordinates
- Stereo
  - side-by-side: cross-eyed, wall-eyed, custom angle
  - anaglyphic: red-blue, red-cyan, red-green, custom
- Perspective: orthogonal or conical
- Synchronization of several applets
- "Navigation" mode (fly through the model)
- Interactive Ramachandran plots

www.[Jmol.org](http://Jmol.org)
